Strategic frame work has been prepared to meet shortage of nurses in future in the following manner:—

(i) Establishing Auxiliary Nurse Midwifery (ANM) and General Nursing and Midwifery (GNM) schools in those districts (230) which are not having both these training programmes.

(ii) Establishing post graduation Nursing (M.Sc., Nursing) Institutions.

(iii) Regional Institute of excellence be established with the objective of improving the standard on all India basis and provide opportunity to access high quality Nursing Education through out the country.

(iv) Developing Cadre of nurse midwifery practitioners and establishing training institutions.

Gene banks for Medicinal plant promotion

†4059. SHRIMATI MAYA SINGH : Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that Government of Madhya Pradesh has forwarded proposals to the Central Government to set up gene bank to facilitate plantation of medicinal plants on private land in various districts;

(b) if so, the present status thereof;

(c) by when they are likely to be cleared; and

(d) the reasons for delay?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMI): (a) No, Sir.

(b) to (d) In view of reply to (a) above, questions does not arise.

Pneumonia cases in the country

4060. SHRI ABU ASIM AZMI: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether Government are aware that the largest number of children die of pneumonia in the world are in India;

(b) if so, the number of such cases during the last three years, year-wise and State-wise;

†Original notice of the question was received in Hindi

(c) the reasons for not taking proper steps by Government for protection of children who are the next generation of the nation; and

(d) the steps being taken for safely and protection of children from this and similar other diseases?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMI): (a) As per the State of the World's Children, 2006, brought out by UNICEF, India is the highest in the world in terms of absolute number of births and infant deaths. It is a fact that 16 lakh infants die each year and out of which 11 lakh die during the first month of birth. The majority of deaths (19%) druing the first year of birth are due to pneumonia.

(b) As per information available from the Central Bureau of Health Intelligence (CBHI), the number of cases and deaths due to pneumonia, gender-wise and State/UT-wise for the last three years, as received in the monthly reports from Directorate of Health Services is given in the Statement I, II and III. (*See* below)

(c) and (d) Child Health has been a part of the Family Welfare Programme of the Government since 1977 and the measures taken have succeeded in reducing Infant Mortality Rate from 140/1000 live births in 1975 to 58/1000 live births in 2005. The steps currently being taken for safety and protection of children from this and similar other diseass are implementation of the Integrated Management of Neonatal and Childhood Illnesses (IMNCI) strategy, which adopts a holistic approach to the management of the commonest causes of neonatal and childhood moraltiy—sepsis, acute respiratory infections (pneumonia), diarrhea, measles and malaria, all compounded by malnutrition. IMNCI will be implemented throughout the country in a phased manner. In addition, thrust is being given to ensure institutional deliveries and train health personnel on essential newborn care so that skilled attendance at birth is available and all newborns recieve specialized care. Efforts to deliver new born care, both facility based as well as home based, are being made. Micronutrient supplementation with Vitamin A, Iron Folic Acid and Zinc are being made. Infant and Young Child Nutrition are being stressed. Immunisation is one of the thrust areas of the ongoing Reproductive and Child Health Programme. The National Rural Health Mission, launched in April, 2005 for a period of 7 years (2005 to 2012) is an overarching intervention with a holistic approach and has envisaged reduction in Infant Mortality and Neonatal Mortality as one of the prime goals to be achieved.
